

## REMARKS

The present Amendment corrects a typographical omission in claim 1 which was noted after filing. The inclusion of a comma at the end of the phrase "using said diastolic timing signals" improves the understandability of claim 1.

**IN THE CLAIMS**

Please amend claim 1 as follows:

1. (Amended) An implantable medical device comprising:  
a pressure sensor adapted to be positioned in the right ventricle of a heart, for measuring right ventricular pressure and for generating a pressure signal corresponding to the measured right ventricular pressure;  
a timing unit supplied with said pressure signal which determines, from said pressure signal, diastolic timing signals identifying a beginning and an end of a diastolic phase of the heart; and  
a signal processor connected to the timing unit and also supplied with said pressure signal, said signal processor, using said diastolic timing signals, determining from said pressure signal a diastolic pressure signal representing right ventricular pressure only during the diastolic phase of the heart cycle.
